Mobile no. : 7827810848

Personal profile :

I am a post graduate and as science has dynamic nature I have updated knowledge in the field of science. During my school experience program (SEP) in B.Ed. I taught students on online platform which enriched my adaptable teaching style required for development of students. Integration of technology in education is a crucial step to enhance the teaching and learning experience. I am inclined towards continuous professional development. I believe that science should be learnt by engaging in interactive experiments for development of scientific temperament. By doing so students will rely on an enquiry based approach which will ultimately make the teaching learner centric.
